

THE WORLD LEADER IN COMPRESSED AIR INNOVATION & MANAGEMENT

# ULTRA-EFFICIENT COMPRESSED AIR SOLUTIONS

COOLING | AIR AMPLIFICATION | VACUUM SYSTEMS | STATIC ELIMINATION

Engineers by nature are inquisitive people, and we're no exception. Cabinet coolers, Air Amplifiers, Air Saver Nozzles—these and many of our other products sound as if they are too good to be true. But after applying these products to all types of processes for over 20 years, our customers can tell you they are for real. If you are interested in saving money by using compressed air more efficiently while also implementing an environmentally friendly solution, **AiRTX products can make the difference you're looking for.**

If you're looking for a way to speed up a dry machining operation, eliminate static electricity on a product, cool an overheated electronic control, or improve productivity in hundreds of other ways, we're positive AiRTX can help you achieve and exceed your goals.

Will it work? Have I sized the product correctly? Will it tolerate factory conditions? We expect questions from you. If you haven't used one of our products before, we don't want you left guessing. Our experienced application engineers are ready to walk you through to a solution that works the first time. They have decades of experience in the proper use of AiRTX products. It's absolutely free, and you're under no obligation—just give us a call!

**Questions? Our engineers are here to help FREE OF CHARGE. Just give us a call at 513-631-0660.**

## HERE'S WHAT OUR CUSTOMERS HAVE TO SAY:

"Our customer requires the end product to be mirror finished and any discoloration from the heat results in a scrap product—causing us to change inserts constantly. The Stainless Steel Model Air Gun 60040 converts normal shop air into a sub-zero air stream and provides instant spot cooling, allowing us to operate far more efficiently and reduce scrap product. **The AiRTX Air Gun Model 60040 increased production by 400% and was paid for during the first hour's run of products.**"

—MIKE BARBER, OWNER  
OF QULITURN MACHINING CENTER

"Our stamping plant used ¼" open copper tubes to help eject parts from our 57 stamping machines. However, the moving, cleaning and changing of dies meant bending, crimping and often changing the ¼" copper tubes—causing them to fail every two to three days. **We've replaced our copper tubes with Sta-Put Hoses and Air Saver Nozzles and drastically reduced our costs associated with this process.** The smarter use of compressed air allowed us to shutdown a 50 HP compressor that was no longer needed, saving \$16,000 per year."

—AUTOMOTIVE RADIO PARTS  
STAMPING PLANT

"The AiRTX Cold Air Gun is such a simple and clean way to eliminate a time consuming step in making furniture. **I use it in almost every drilling, sawing or router operation.** The AiRTX Cold Air Gun also increases tool life by lessening the small heat cracks in the sharp edges of the tools and that means a sharper edge for a larger period of time."

—BURT AARSEN, OWNER OF 1ST IN DESIGN

"We recently purchased the AiRTX Stainless Steel Air Gun and have found it to be a great product. We tested the Air Gun on one of our lathes as well as our horizontal end mill with double angle cutters and it increased tool life on the lathe by 300% with mild steel. In addition, tool life on the end mill was increased by 250% with stainless steel and 350% with mild steel. **I figure that the Air Gun paid for itself within three weeks of purchase.** I highly recommend AiRTX products."

—AGS GROUP, INC.

# INTRODUCING OUR COOLING PRODUCTS

A crafted, well designed and engineered part—the **Vortex Generator**—allows all AiRTX cooling products to deliver five different air flows 8, 10, 15, 25 or 35 CFM. The Vortex Generators are directly responsible for varying degrees of temperature drop from ambient.

**VORTEX TUBES** are designed to mounted in a fixed location for frequent use of cooling a specific spot.

PAGE 12

**AIR GUNS** have the same spot cooling efficiency of Vortex Tubes, but their magnetic base and flexible hose allows for repositioning and portability.

PAGE 16

**CABINET COOLERS** are designed to be mounted on an enclosure to ensure proper cooling of temperature sensitive internal components.

PAGE 8

**THE CABINET COOLING ENCLOSURE** has all the same great features of the Cabinet Coolers, but in a smaller all-in-one design.

PAGE 11

# CABINET COOLERS

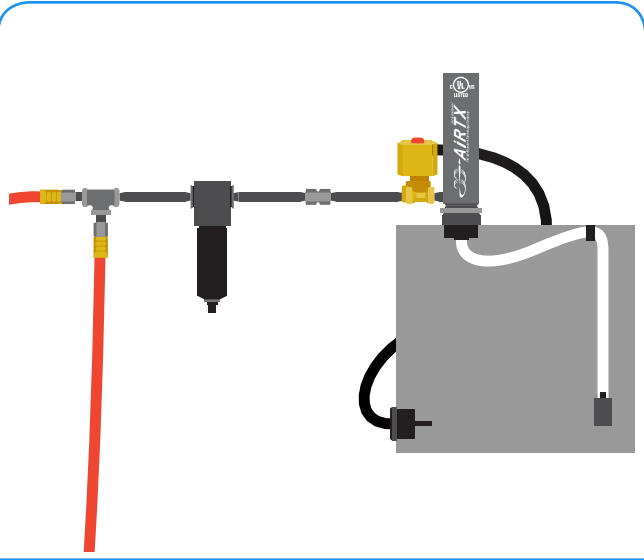

Freon-free, low-cost cooling for controls in hot, hazardous, corrosive or wash-down environments.

## COOLING UP TO 5,600 BTU/H

All Cabinet Coolers are compatible with an optional thermostatic control unit that automatically regulates the temperature inside the enclosure.

A simple, interchangeable part—the Vortex Generator—allows the Airtex Cabinet Cooler to deliver five different air flows 8, 10, 15, 25 or 35 CFM, each with two ranges of cooling performance (high or low).

### APPLICATIONS

- Complement your own OEM equipment to create a better product.
- NC/CNC cabinets
- Industrial PCs
- PLCs
- Measuring instruments and recording devices
- Closed-circuit TV cameras
- Motor controls and relays

### FEATURES & BENEFITS

- No maintenance—No moving parts
- Higher BTU per CFM than other cooling products
- Available in aluminum, stainless steel and 316 stainless steel
- Cooling available from 600–5,600 BTU/H
- No vibration to affect CCTV cameras
- Thermostatically controlled units available
- Compact for cramped factory areas
- Requires no electricity
- No RF/EMI interference
- Muffled for quiet operation
- Maintains NEMA 4, NEMA 4x, and NEMA12 integrity

Cabinet Coolers are designed to keep factory-floor controls online in the worst possible conditions with up to 5,600 BTU/H of cooling. **Dirt, moisture, hazardous or corrosive materials are the “Achilles’ heel” of industrial electronic systems**—and it’s a real hazard when you have to open the cabinet door to prevent heat build-up.

**Compressed-air-operated stainless steel Cabinet Coolers use a low-cost, reliable Vortex Tube, to cool electrical enclosures with filtered air that’s 50°F / 27°C colder than your compressed air supply.** A built-in relief valve lets hot air escape from the enclosure, while the Cabinet Cooler supplies clean, cold air. They mount in a standard electrical knockout to maintain a NEMA 4, 4X, or 12 rating. A built-in, heavy-duty muffler makes the Cabinet Cooler extremely quiet for use in production areas.

➔ Freon air conditioners must be deregulated by 65% at 90°F and 95% at 115°F. Therefore, the **freon air conditioners must operate longer than the Cabinet Cooler or be oversized to provide the same amount of cooling** during warmer weather when the ambient temperature is higher.

The recommended thermostat setting is 90°F (32°C). This setting is within the safe operating limits of most components and reduces condensation on the outside of the cabinet during hot humid weather. Temperature swings create connector stress, while excess heat dries circuit boards and result in life spans of the controls being cut in half for every 20°F (10°C) over normal operating temperatures of 100°F (38°C).

**Cabinet Coolers are very inexpensive insurance against premature replacement of a \$2,000 to \$3,000 electronic circuit board.**

### MODELS

MODEL NUMBER	CONSTRUCTION	CERTIFICATIONS	BTU/H AVAILABLE
75000	Aluminum	NEMA 4/12	600–5,600
70000	Stainless Steel	NEMA 4/12	600–5,600
70000x	Stainless Steel	NEMA 12/4x	600–5,600
70000–316ss	Stainless Steel	NEMA 4/12	600–5,600
70000x–316ss	Stainless Steel	NEMA 12/4x	600–5,600

All Cabinet Coolers include a ducting kit and muffler. An optional 5 micron auto-drain filter, thermostat and solenoid valve are available.

### COST COMPARISON

	AIRTX STAINLESS STEEL BTU MODEL 70325	FREON AIR CONDITIONER 1,800 BTU
INITIAL UNIT COST	\$602 (20 year life); \$30/year	\$2,000 (5 year life); \$400/year
INSTALLATION (ONE-TIME COST)	\$50/hour	\$50/hour
MAINTENANCE	\$0	4 hours/year for charging freon, cleaning & replacing filters, leak checks \$200 per year
OPERATION	5 hours/day, 9 months/year; \$288/year (Based on \$0.25/1000 cu. ft. of air)	7 hours/day, 9 months/year; \$250/year
TOTAL OPERATION COST	\$320.50/year	\$850/year (Not including downtime for repairs)

# CABINET COOLER

## TECHNICAL DATA

### Typical Installation

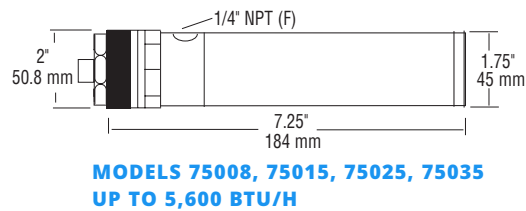

This is the typical installation of a Cabinet Cooler with optional 5-micron filter and thermostatic control unit.

### 75000 Series

Constructed from aluminum and compatible with NEMA 4/12 cabinets.

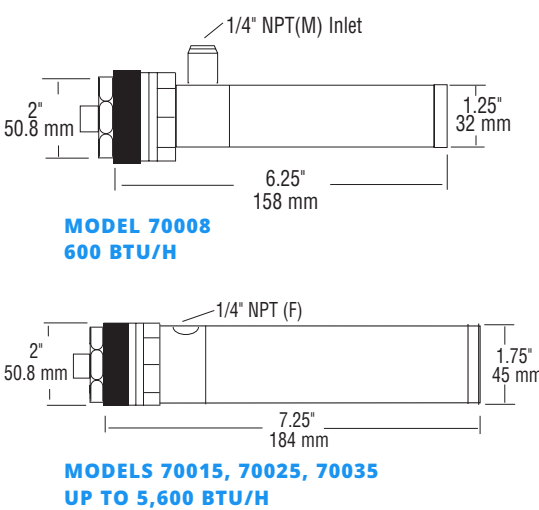

Note: 5,600 BTU/h of cooling requires two Model 75035 units.

### 70000 Series & 70000-316ss Series

Constructed from stainless steel or 316 stainless steel and compatible with NEMA 4/12 cabinets.

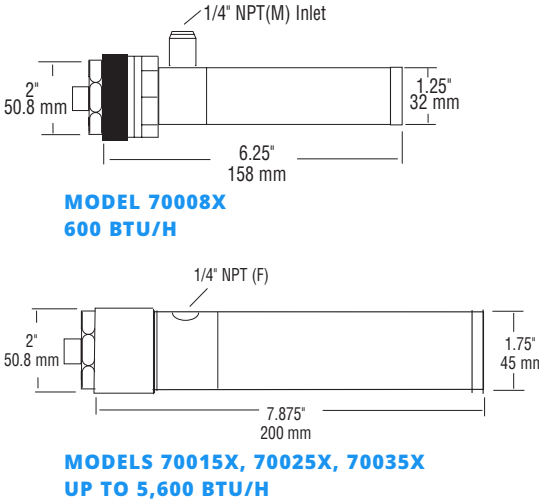

Note: 5,600 BTU/h of cooling requires two Model 70035 units.

### 70000x Series & 70000x-316ss Series

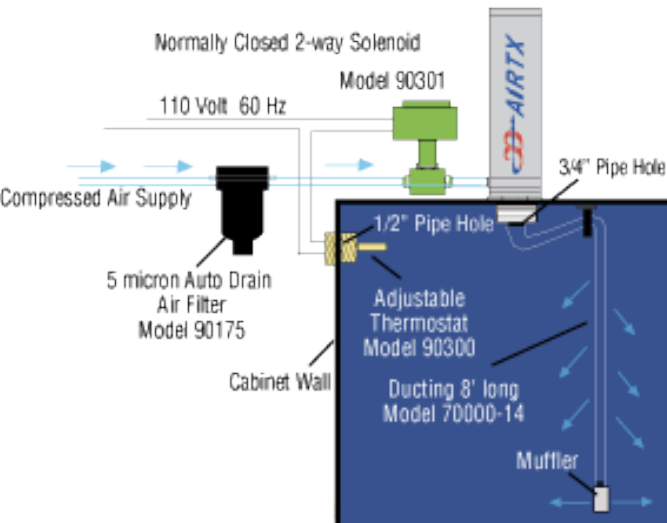

Constructed from stainless steel or 316 stainless steel and compatible with NEMA 12/4x cabinets.

Note: 5,600 BTU/h of cooling requires two Model 70035x units.

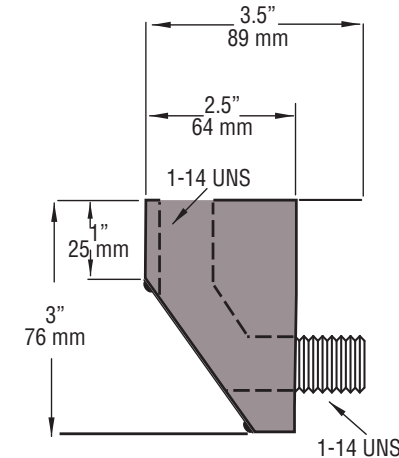

### Cabinet Cooling Enclosure

**An easy-mount, turnkey Cabinet Cooling Enclosure.** The Cabinet Cooling Enclosure has all the critical components of a thermostatically controlled Cabinet Cooler packaged together in an ultra-convenient, turnkey enclosure. Simply attach a power supply and compressed air line, then mount the all-in-one enclosure to the cabinet.

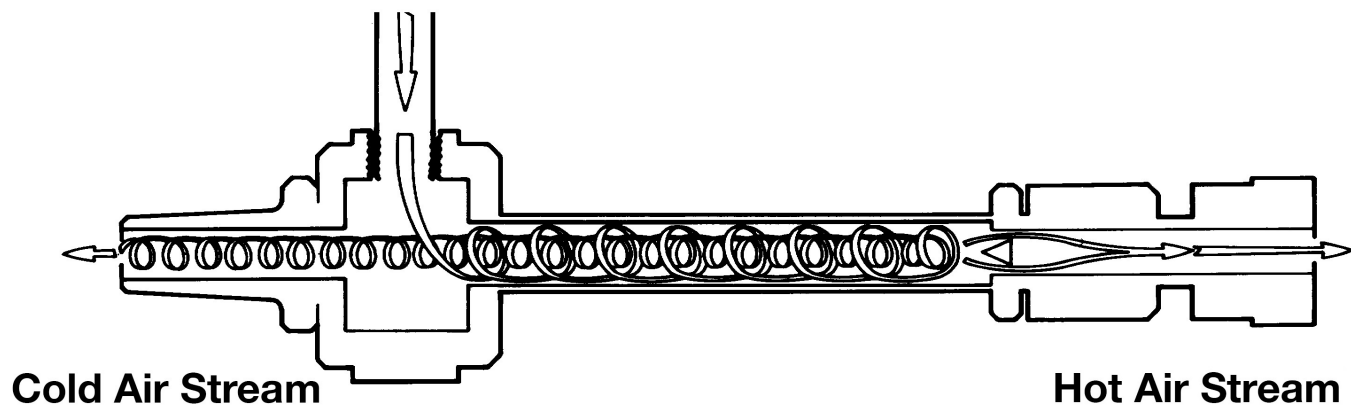

### Cabinet Cooler Mounting Elbow

**Perfect for tight spaces and upright positioning.** The AiRTX Cabinet Cooler works efficiently no matter where it's placed and can be mounted anywhere using the Mounting Elbow, even in small spaces. The Model 70000-11 is attached to the cabinet wall through a 1" hole. O rings seal the mounting Elbow maintaining the integrity of a NEMA 4 or 12 Cabinet.

# VORTEX TUBES

Reliable and efficient air with temperature control.

COOLING UP TO 2,800 BTU/H

A Vortex Tube turns standard compressed air into two air streams—one very cold and one hot—using no moving parts. **A simple, low-cost Vortex Tube can transform 70°F (21°C) input air into temperatures as low as -40°F (-40°C) as high as 230°F (110°C).** That’s up to 2,800 BTU/H of cooling with air flow rates up to 35 CFM.

Simply set the cold temperature output with the handy control knob and your thermometer. **No tools are required.** Assuming your compressed air input pressure and temperature remain constant, a Vortex Tube will hold output temperatures ±1°F (±0.6°C).

A simple, interchangeable part—the Vortex Generator—allows the AiRTX Vortex Tube to deliver five different air flows 8, 10, 15, 25 or 35 CFM, each with two ranges of cooling performance (high or low).

FEATURES & BENEFITS

- No moving parts, portable, lightweight and low cost
- Uses no electricity, freon or chemicals
- Instant on/off, easy to control
- Generate cold and hot air from a single device
- Available in stainless steel or aluminum

20000 SERIES  
STAINLESS STEEL

## STAINLESS STEEL VORTEX TUBE

The 20000 series Vortex Tube is made from durable 304 stainless steel and can produce 600–2,800 BTU/H of cooling power.

20000-316 SERIES  
STAINLESS STEEL

## 316 STAINLESS STEEL VORTEX TUBE

The 20000-316 series Vortex Tube is made from ultra-strong 316 stainless steel **to ensure it can withstand even the harshest environments** and can produce 600–2,800 BTU/H of cooling power.

25000 SERIES  
ALUMINUM

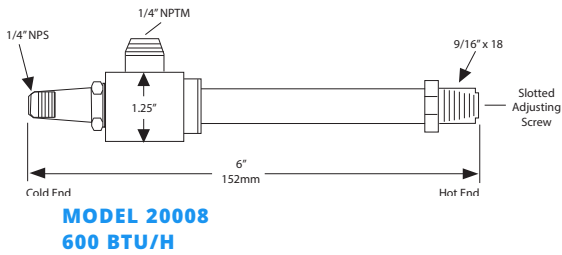

## ALUMINUM VORTEX TUBE

The 25000 series Vortex Tube is made from durable and lightweight aluminum and can produce 600–2,800 BTU/H of cooling power.

# VORTEX TUBES

## COOLING EQUATION

The cooling power in BTU/H can be found with the following formula.

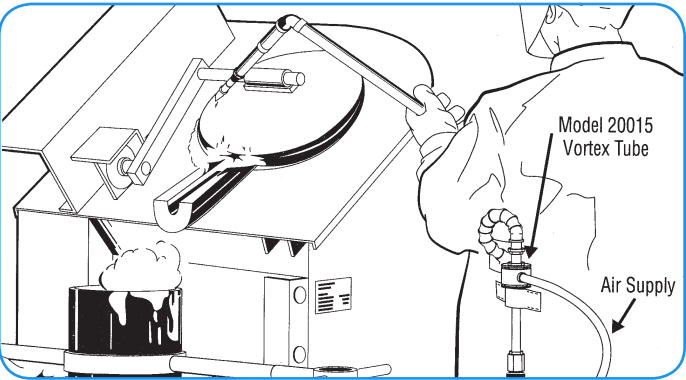

**BTU/H = 1.0746 X CFM X (Inlet Temperature – Outlet Temperature)**

## APPLICATIONS

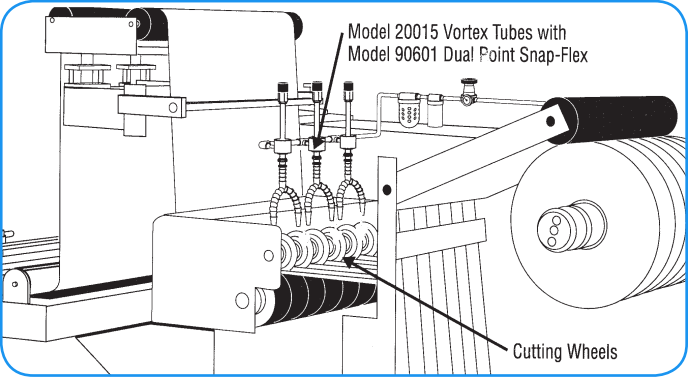

### Spot Welding

Cooling this spot welding operation with a Vortex Tube virtually eliminates secondary smoothing operations and greatly improves the appearance of the product.

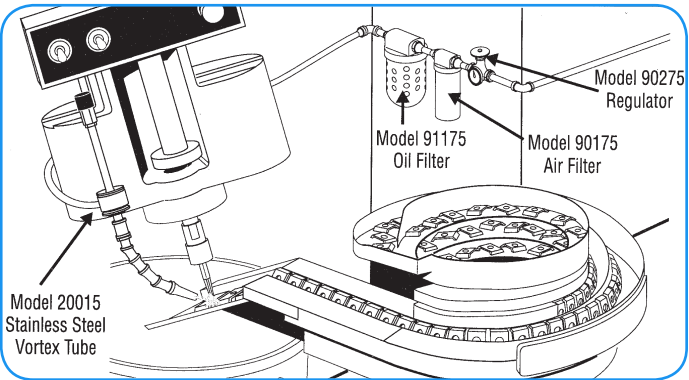

### Foundry Operations

Cold air from a Vortex Tube is piped into a foundry worker's protective suit. The Vortex Tube has a large control knob, allowing the cold air to be adjusted while wearing gloves.

### Slitting

Cutting wheels on this slitter can work at top speed—and stay sharper longer—when cold air from Vortex Tubes eliminate the frictional heat buildup. The trim edge is also cleaner.

### Tapping

Tapping brass clips is completed without messy liquid coolants using 0°F (-18°C) air from a Vortex Tube to cool the tap. The brass does not have a chance to gum up, the cut is cleaner, and secondary cleaning operations are eliminated.

# AIR GUNS

Sub-freezing air for dry machining and spot cooling industrial processes.

## VARIABLE FLOW RATE UP TO 2,800 BTU/H OF COOLING

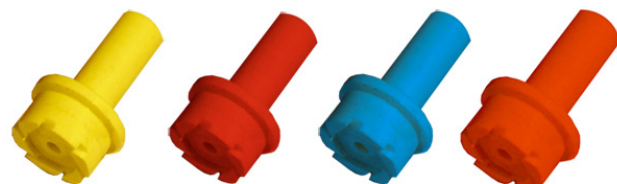

The AiRTX Air Gun is a portable cold-air source for improving dry machining operations or spot-cooling a wide range of industrial processes. At its core, the Air Gun is powered by a reliable AiRTX Vortex Tube and is available in a variety of flow and cooling rates. **Using 80 psi of compressed air, the Air Gun produces a stream of cold air 75°F (41°C) below your compressed air temperature.** Simply put the gun on where you need it using the magnetic base and aim the cold air stream onto your work with the flexible hose.

Air Guns are heavy-duty and built for the rigors of the factory-floor. They are precision-machined from heavy-gauge stainless steel, then assembled and tested under strict quality control. They will never pit or rust when subjected to coolants, water, or other corrosive materials.

### FEATURES & BENEFITS

- No liquids, ozone-depleting chemicals or residue
- Increase feeds, speeds and quality
- Eliminates liquid coolant cost, contamination, skin irritation and mess
- Finishes the job with a clean, dry part
- Improves tool life, production rates, finish and tolerances
- Eliminates micro-cracking and burning
- Reduces wheel loading and dressing

A simple, interchangeable part—the Vortex Generator—allows the AiRTX Air Gun to deliver five different air flows 8, 10, 15, 25 or 35 CFM, each with two ranges of cooling performance (high or low).

**MODEL 60015**

## AIR GUN

Made from durable stainless steel, it can produce air at flow rates of 10, 15, 25 or 35 CFM with up to 2,800 BTU/H of cooling power. The Air Gun is powered by the reliable AiRTX Vortex Tube and the internal Vortex Generator is a stationary, interchangeable component that determines the air consumption and cooling power.

**MODEL 60051**

## ADJUSTABLE AIR GUN

Made from durable stainless steel with all the same features of the standard Air Gun, but with an adjustment knob to customize the flow and temperature range of the internal Vortex Generator.

**MODEL 60061**

## ADJUSTABLE LOW-FLOW AIR GUN

Made from durable stainless steel in a smaller form factor than the Adjustable Air Gun, it utilizes only 10 or 15 CFM of air and splits the output stream into two separate, positionable streams of air.

**MODEL 60071**

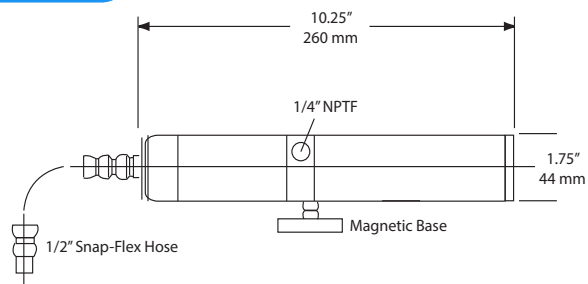

## COMPACT AIR GUN

The Compact Air Gun is made from lightweight aluminum and is perfect for tight spaces or when moderate cooling power is all the job requires.

# AIR GUNS

## APPLICATIONS

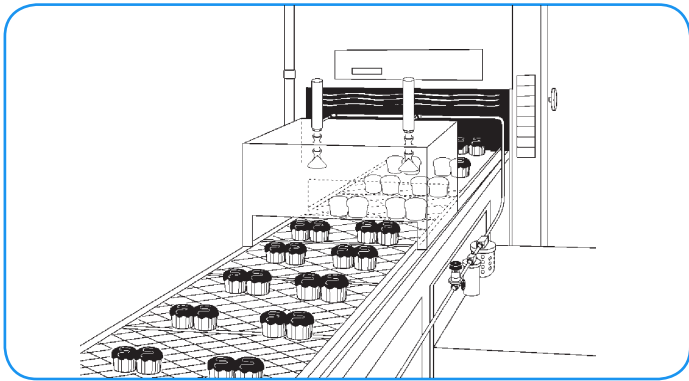

### Plastics Machining

The AiRTX Air Gun speeds production on this plastics machining operation and improves finish by cooling cutting tool with 10°F (-12°C) air.

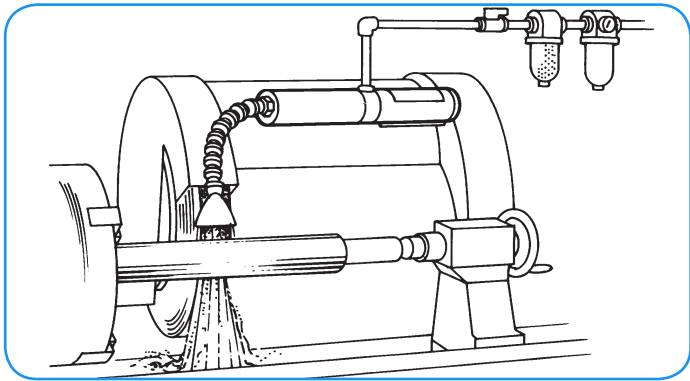

### Sewing & Embroidering

In production sewing or embroidering, the AiRTX Air Gun eliminates needle heat build-up, which can cause thread burn-through and stoppages.

### Product Cooling

Two Stainless Steel AiRTX Air Guns in a plastic enclosure provide clean, dry, cold air to cool baked goods—for a tiny fraction of the cost of a long cooling conveyor. Conveyor distance was cut from 22 feet to 8 feet.

### Grinding

Grinding speed can be increased, while still holding tolerances, by using the AiRTX Air Gun to cool the wheel and material.

Compressed air discharge to atmosphere through sharp, square edged orifice and sea level CFM.

Visit [AiRTX.com/AirUse](https://www.airtx.com/AirUse) for a detailed air consumption comparison.

When approaching any air amplification decision, one must first consider two critical elements of the job: flow pattern and efficiency.

CONICAL FLOW PATTERN

These AiRTX products move air in a conical flow pattern than is best for ejecting, blowing or drying a focused area. If the nozzle cannot be placed in close proximity to the target area, certain nozzles offer a longer “throw” in order to properly reach their desired location.

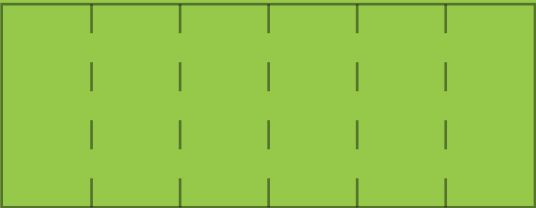

EFFICIENCY

WIDE CURTAIN FLOW PATTERN

These AiRTX products move air as a solid curtain or sheet. Wedges and Air Knives can produce a curtain of high-velocity air as thin as 2" wide up to several feet in length.

EFFICIENCY

# AIR KNIVES

The most efficient and cost effective compressed air delivery method for the large drying, cooling or cleaning applications.

UP TO 50:1 AIR FLOW AMPLIFICATION

CUSTOM SIZING AVAILABLE  
AVAILABLE IN LENGTHS  
FROM 6" TO 36"

The overall length of each Air Knife is 1" longer than the effective length to allow for an air connection to either end. Air Knives over 18" should be supplied with air from both sides. Increase airflow of the Air Knife by installing additional .003" shims. Stainless Steel shims are available for high heat applications.

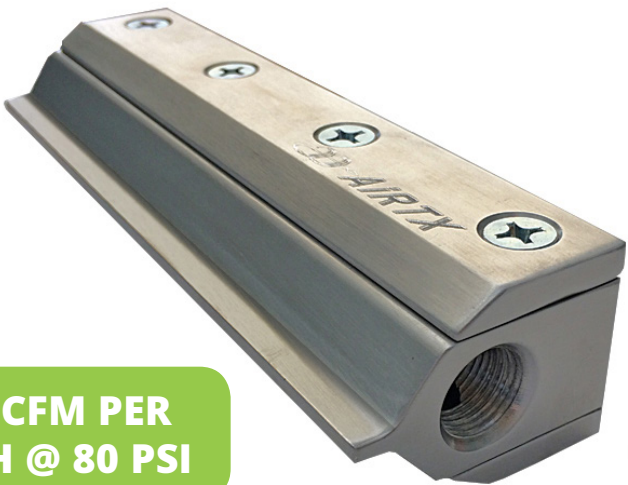

The Air Knife creates a smooth sheet of air across its entire length. Three different models of Air Knives deliver amplified air up to a ratio of 50:1.

APPLICATIONS

- Removing water from sheet plastic or metal
- Blowing off chips, trim scrap and swarf
- Parts cleaning before painting
- Creating an "air wall" between processes
- Cooling extruded parts
- Cleaning or cooling of metal strip and plastic or paperwebs
- Cleaning or cooling of conveyors and conveyORIZED parts

FEATURES & BENEFITS

- Wide area blow-off or cooling with less noise
- Replace open Jets with AiRTX Air Knives
- Low initial and operating costs
- Up to 70% less compressed air usage than open air lines
- Easy to control flow/force
- Instant on/off
- No rotating machinery, guards or clumsy ducts
- No maintenance, no moving parts
- No electricity or explosion hazard
- No RF/EMI interference

5.5 CFM PER INCH @ 80 PSI

MODEL 86006

## HURRICANE AIR KNIFE

The aluminum Hurricane Air Knife creates 50:1 air flow amplification via entraining air on both sides. It's perfect for processes that require the an immense volume of air.

MODEL 85012

4 CFM PER INCH @ 80 PSI

MODEL 80012

## INDUSTRIAL AIR KNIFE

The Air Knife is available in either aluminum or stainless steel and amplifies air at a 25:1 ratio. It's available in a variety of different lengths—choose the one that best works for your job!

MODEL 82006

## SLIM LINE AIR KNIFE

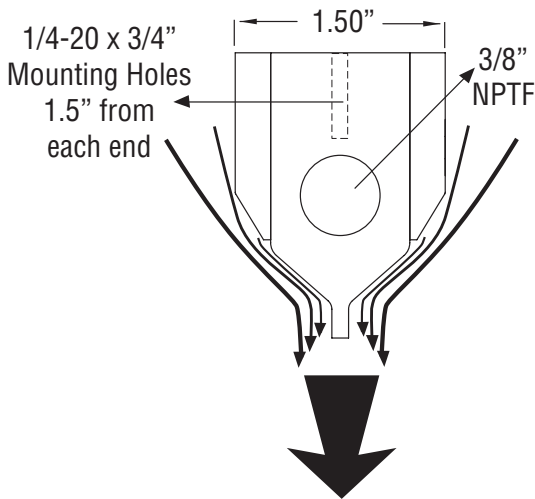

The Slim Line Air Knife pushes slightly less air than the standard Air Knife, but it's low profile is a perfect solution for a tighter working environment. It consumes 30% less air than the standard Air Knife with the same 25:1 air amplification.

*SlimLine*

#### 82000 SERIES PERFORMANCE CHART

AIR INPUT (PSI)	20	40	60	80	100
CFM	1.0	1.5	1.9	2.2	3.6
LPM	28	42	54	62	102

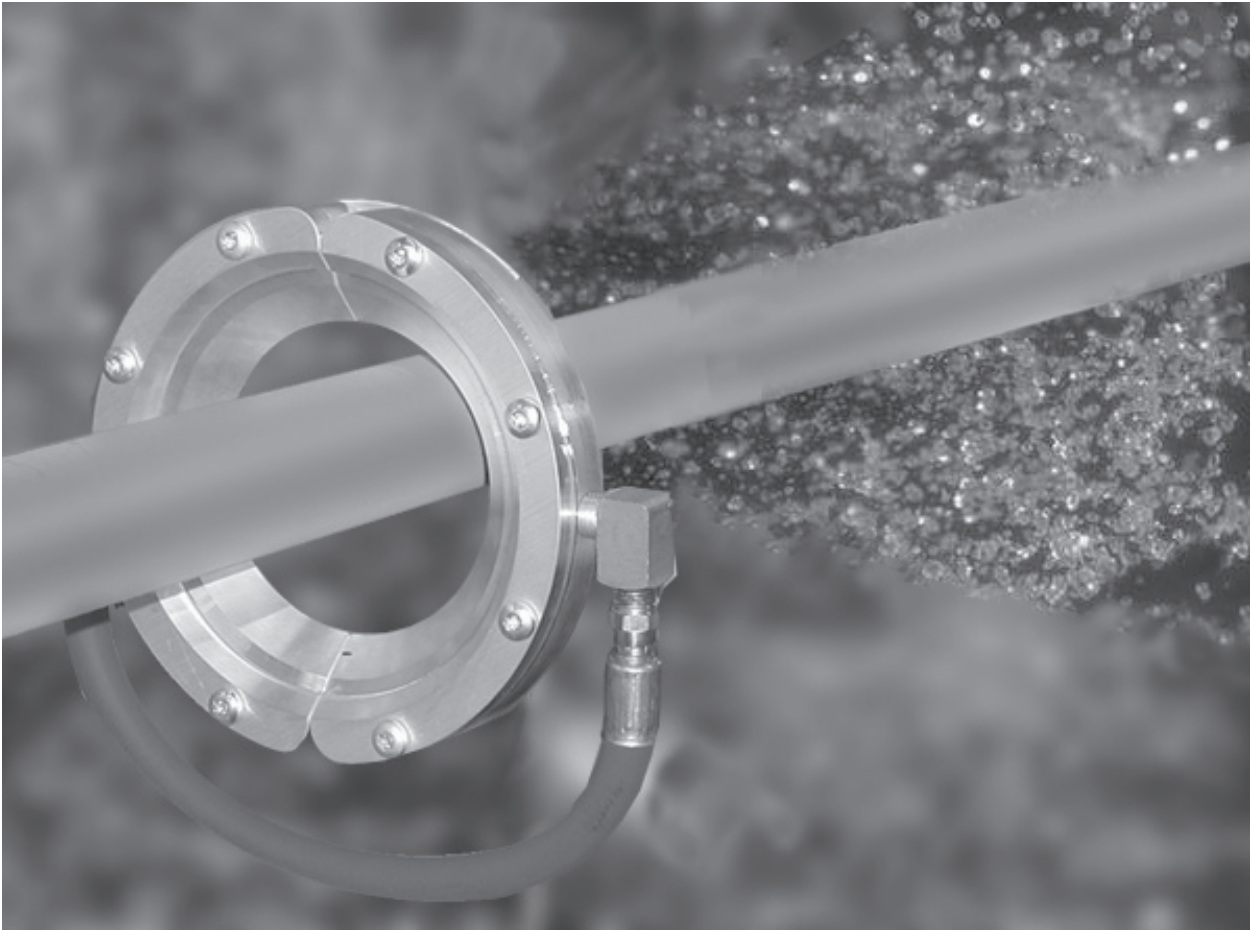

Air usage per inch when used with a .003" shim.

➡ The overall length of each Air Knife is 1" longer than the effective length to allow for an air connection to either end. Air Knives over 18" should be supplied with air from both sides.

Increase airflow of the Air Knife by installing additional .003" shims. Stainless Steel shims are available for high heat applications.

# GATE AIR WIPES

A two-piece hinged air amplifier that provides a ring of high-volume, high-velocity Air.

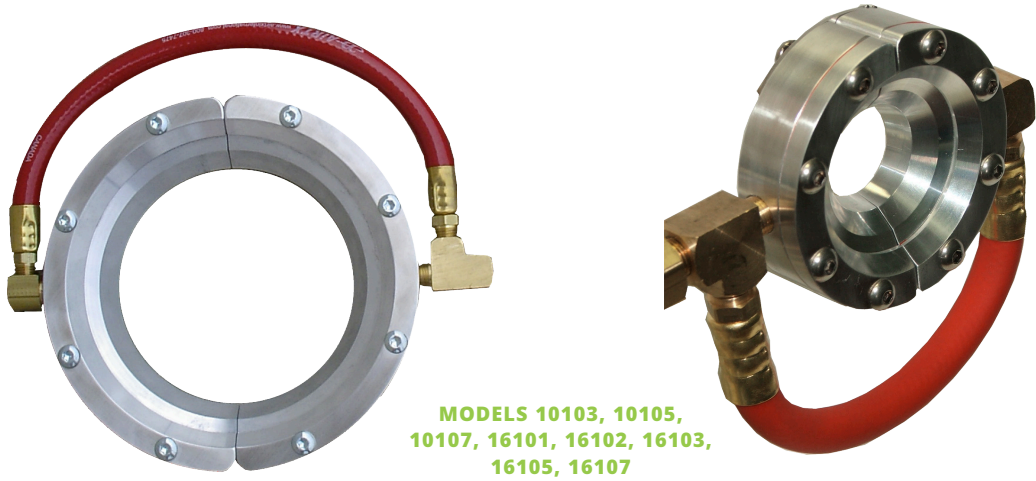

The Gate Air Wipe amplifies compressed air at a 25:1 ratio and provides a circular air flow for cooling, drying or removing debris on all sides in a single pass. The hinged, open and shut design allows for easy placement of products within the ring. Aluminum and stainless steel Gate Air Wipes are available in various so you’re sure to find the right tool for the job.

FEATURES & BENEFITS

- Applies amplified air 360° around the product
- Hinged design makes product placement easy
- No maintenance, no moving parts
- Easy to control flow/force
- Greatly reduced noise
- No electricity or explosion hazard
- Instant on/off

# GATE AIR WIPES

## TECHNICAL DATA

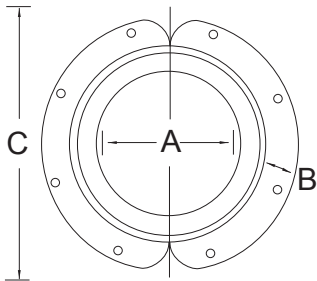

16000 Series

Made from aluminum. Available in 5 different inner diameters: 1" (25mm), 2" (50mm), 3" (76mm), 5" (127mm) and 7" (178mm).

10000 Series

Made from stainless steel. Available in 3 different inner diameters: 3" (76mm), 5" (127mm) and 7" (178mm).

DIMENSIONS

10000 SERIES	16000 SERIES	A	B	C	AIR INLET

10107	16107	38	56	70	80	90

Air usage when used with a .003" shim.

# HURRICANE ADJUSTABLE AIR AMPLIFIERS

Create a high-speed “tube” of air for blow-off, ventilation, air conveying and more.

AiRTX Hurricane Adjustable Air Amplifiers move a lot of air with only a small amount of supplied compressed air. Use them ducted or open—the same way you’d use a vacuum system, fan, or blower—to handle dust, fumes or granular material. Output is fully adjustable without tools or shims, making set-up a breeze. There are five sizes available in aluminum and four sizes in stainless steel.

In ducted applications using the factory-set nozzle opening, Hurricane Adjustable Air Amplifiers deliver amplification ratios up to 25:1, capable of producing output flows up to 2000 SCFM (56,000 SLPM). When used unducted, amplification ratios increase up to 75:1.

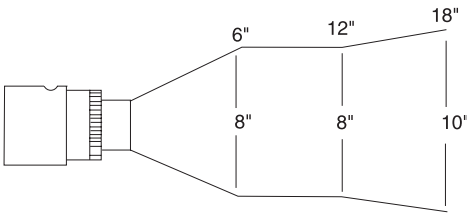

FEATURES & BENEFITS

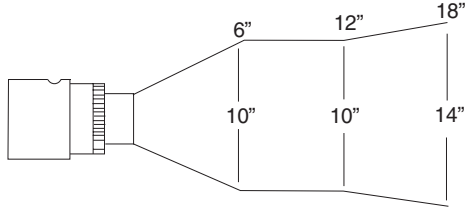

- Adjustable output without tools or shims
- Multiple sizes available
- Used for blow-off, ventilation or conveying
- No blades or guards
- No maintenance, no moving parts
- Easy to control flow/force
- Greatly reduced noise
- Instant on/off

# ADJUSTABLE AIR JETS

A variable nozzle and in-line vacuum in one.

MEETS OSHA NOISE & DEAD-END PRESSURE REQUIREMENTS

Adjustable Air Jets are made from solid brass and meet all OSHA noise and dead-end pressure requirements. Air Jets are commonly used in blow-off operations, but can also be used in air-conveying to move dust, powders and fumes more efficiently than other methods. The air amplification power of AiRTX Air Jets reduce demand on compressors and slash energy bills—creating a rapid return on investment.

MODEL 38038E

MODEL 38038

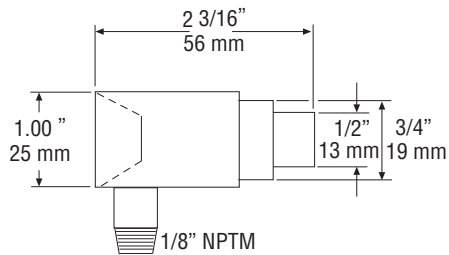

MODEL 38044

FEATURES & BENEFITS

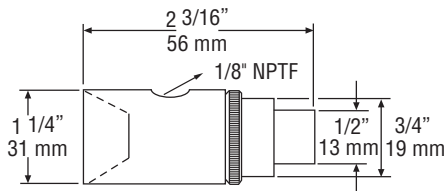

- More efficient than open tubes
- Low noise
- Easy to control flow/force
- Instant on/off
- No maintenance, no moving parts
- Solid brass construction

# ADJUSTABLE AIR JETS

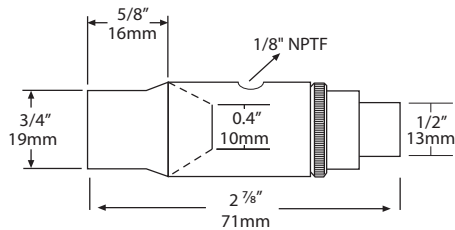

## TECHNICAL DATA

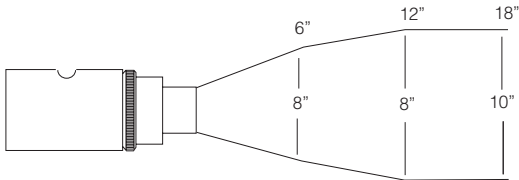

MODEL 38038E

MODEL 38038

MODEL 38044

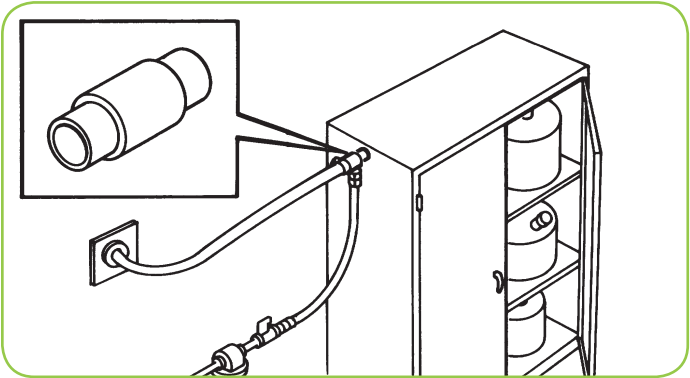

All three models of Air Jet have a very similar flow pattern.

PERFORMANCE CHART

DISTANCE FROM TARGET	PRESSURE AT TARGET (PSI)			
	40 PSI	60 PSI	80 PSI	100 PSI
6"	7.5oz	11.8oz	16.5oz	22.2oz
12"	6.9oz	11.5oz	16.2oz	21.4oz
18"	5.6oz	9.3oz	13.7oz	17.4oz

Measurements given in ounces of thrust. Jet set to 20 CFM @ 80psi

## APPLICATIONS

### Fume Removal

An Air Jet system uses only 3 CFM (85 LPM) of compressed air to remove hazardous fumes from this solvent storage cabinet. Air flow amplification provides the required ventilation without dangerous fan blades or expensive electric motors.

### Food Processing

Air Jets remove water and dries cans in this soup processing plant. The adjustable thrust feature produces maximum drying to ensure peak line speed.

# WEDGES

A high-thrust sheet of air without the need for additional shims.

MEETS OSHA NOISE & DEAD-END PRESSURE REQUIREMENTS

AiRTX Wedges create thin, high-thrust flow of air up to a 25:1 amplification ratio. Wedges are available in 2" and 4" widths and either in a standard unit or a **high-powered Hurricane model that doubles the thrust without doubling the air usage**. All Wedges are available in aluminum or stainless steel.

MODEL 30054

MODEL 30150

FEATURES & BENEFITS

- No shims
- 25:1 Air Amplification
- Highest thrust of any nozzle
- Wide air flow
- Reduce compressed air costs by 30% to 50%
- Reduces noise levels of open air lines by 30 dBA
- Easy to control flow/force
- Instant on/off
- No maintenance, no moving parts

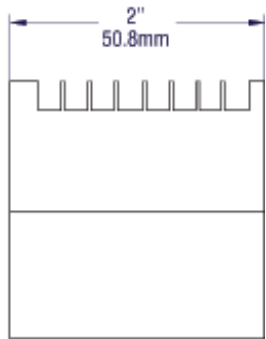

# WEDGES

## TECHNICAL DATA

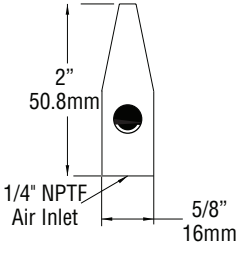

Hurricane Wedge

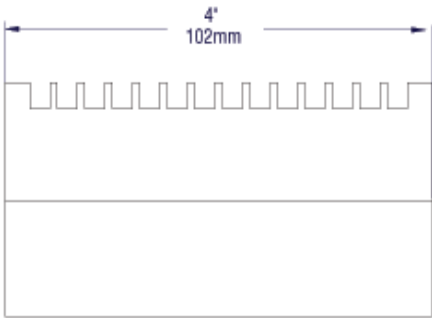

The Hurricane Wedge doubles the amount of thrust over the standard Wedge, without doubling the CFM of air consumed!

# FORCE NOZZLES

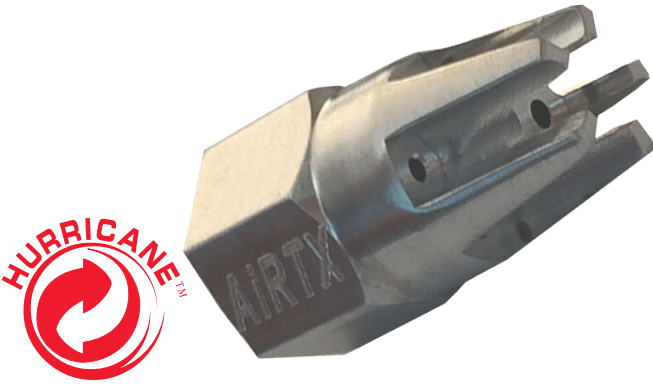

Ultra-efficient air amplification at a fraction of the cost of other methods.

MEETS OSHA NOISE & DEAD-END PRESSURE REQUIREMENTS

UP TO 25:1 AIR FLOW AMPLIFICATION

Force Nozzles are fixed-flow nozzles that drastically improve compressed air efficiency over open tubes or breakable plastic nozzles. They are available in aluminum or stainless steel and **a powerful Hurricane version provides double the thrust over the standard Force Nozzle without doubling the CFM of air used.** When the most power is required, the 1/2" Hurricane Force Nozzle provides even more thrust over the it's 1/4" counterpart.

- FEATURES & BENEFITS
- Reduced noise level
  - Efficient use of compressed air
  - High thrust
  - Hurricane versions for heavy-duty applications
  - Outlasts cheap plastic nozzles

AIR CONSUMPTION	9 CFM (255 LPM)	13 CFM (368 LPM)	15 CFM (425 LPM)	19 CFM (538 LPM)

Measurements given in ounces of thrust.

# ADJUSTABLE AIR NOZZLES

Versatile, high-volume air flow with the lowest possible consumption.

MEETS OSHA NOISE & DEAD-END PRESSURE REQUIREMENTS

UP TO 25:1 AIR FLOW AMPLIFICATION

To ensure you’re operating as efficiently as possible, **AiRTX Adjustable Air Nozzles can be adjusted from 0 CFM to 25 CFM at 80psi in order to fine tune the exact amount of air you need for the job.** Adjustable Nozzles greatly reduce noise compared to open pipes while also relieving strain from compressors. Since they’re adjustable, it’s easy to migrate a nozzle to a different application without needing to purchase new equipment.

MODELS 48109, 48009

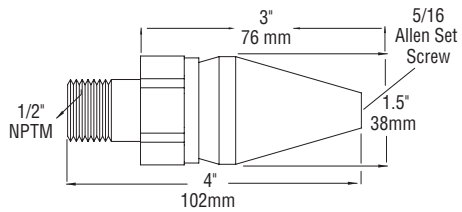

MODEL 48004

FEATURES & BENEFITS

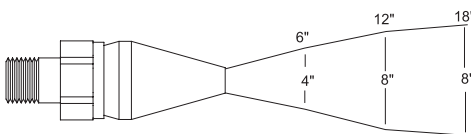

- High-volume, low-consumption
- Reduces noise
- Reduces demand on compressors
- Adjustable flow
- Aluminum or stainless steel options
- Hurricane version available for heavy-duty applications

AIR CONSUMPTION	9 CFM (255 LPM)	13 CFM (368 LPM)	15 CFM (425 LPM)	19 CFM (538 LPM)

Measurements given in ounces of thrust.

# FIXED-FLOW AIR NOZZLES

The smartest approach to compressed air use around the entire facility.

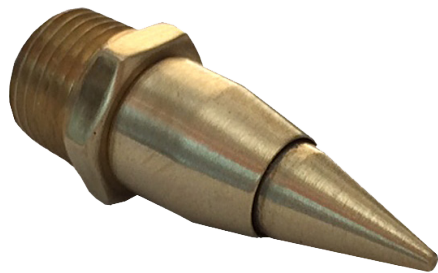

AiRTX Fixed-Flow Air Nozzles can easily be added to almost any application. They amplify air at a ratio of 25:1, which reduces demand on compressors and saves on energy costs. **Multiple styles of nozzle are available, including a low-flow model that uses less than 2 CFM at 80 psi.** The AiRTX Rubbertip Nozzle is great for use where the nozzle may come in contact with soft or sensitive materials. Most nozzles are available in brass or stainless steel.

FEATURES & BENEFITS

- 25:1 Air Amplification
- 1.8 to 9 CFM models available
- Ultra-efficient use of compressed air
- Brass and stainless steel models
- Rubbertip Nozzle is great for soft materials

Low-Flow Air Nozzles

**Models 40002 and 48002.** Model 40002 (stainless steel) and Model 48002 (brass) use only 1.8 CFM of air and are perfect for jobs requiring a moderate amount of force or minimum air usage.

# AIR AMPLIFICATION

## ACCESSORIES

### Blow Guns

AiRTX Blow Guns are the perfect companion for any AiRTX Nozzle. There are two different styles of Blow Gun: nylon with hand trigger and chrome with thumb control. Both Blow Guns are compatible with AiRTX Sta-Put Hoses to extend their reach.

MODEL 48011  
NYLON WITH HAND TRIGGER

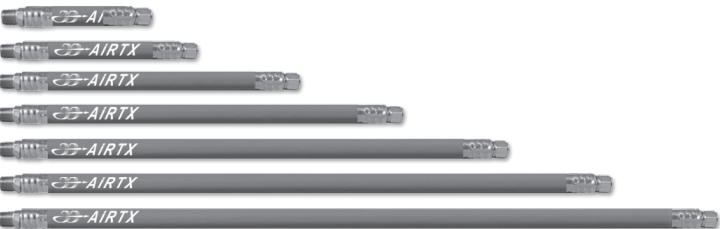

MODEL 48211  
CHROME WITH THUMB CONTROL

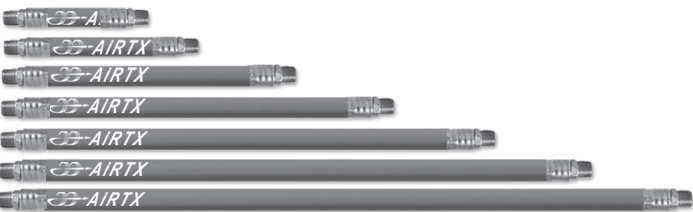

### Sta-Put & Heavy Duty Sta-Put Hoses

Sta-Put Hoses are flexible, durable 3/8" diameter compressed air lines that can replace copper tubes. Heavy Duty Sta-Put Hoses are larger 1/2" diameter hose and equally flexible. All hoses "stay put" even while under high-pressure compressed air and can be used in conjunction with AiRTX Air Amplification products. Each model is available in lengths from 6" to 36".

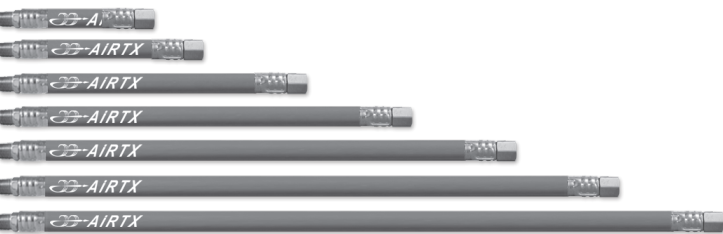

Sta-Put and Heavy Duty Sta-Put Hoses all have a 1/4" air input but have different end-fittings for various applications: 1/8" NPTF, 1/4" NPTM or 1/4" NPTF. BSP threading is available by request.

40000 SERIES  
WITH 1/8" NPTF FITTING

40001 SERIES  
WITH 1/4" NPTM FITTING

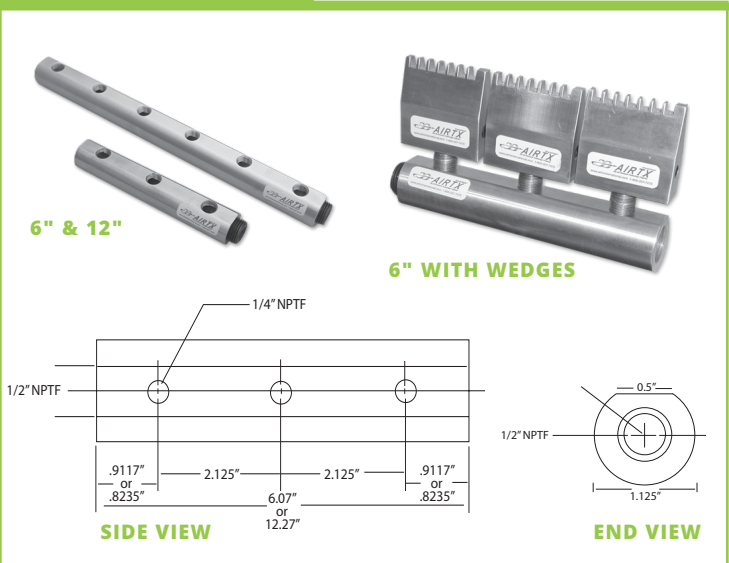

40002 SERIES  
WITH 1/4" NPTF FITTING

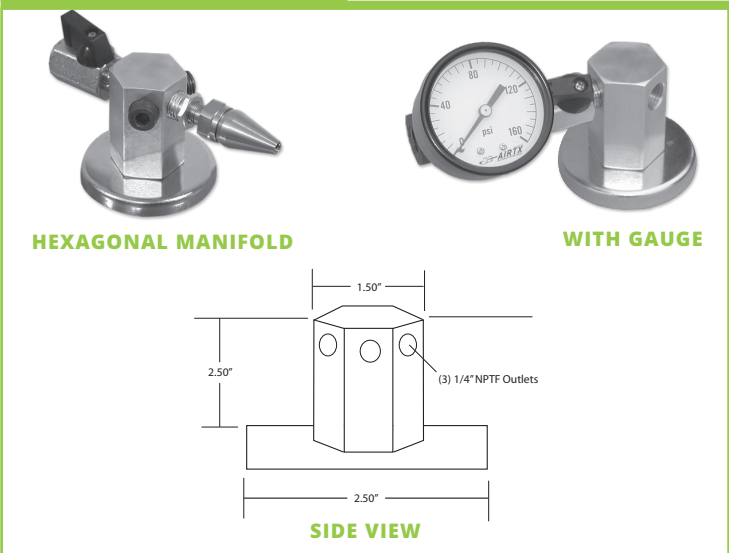

### Manifolds

Simplify your compressed air system by installing AiRTX Manifolds. Manifolds are compatible with all AiRTX Wedges, Nozzles and Sta-Put hoses and are available in aluminum or stainless steel. Straight manifolds come in two lengths: 12" 6-port or 6" 3-port configuration, and they can be connected end-to-end for extended length. Hexagonal manifolds allow for multi-angled air direction, offering up to 3 air outlets plus a magnetic base.

#### STRAIGHT MANIFOLDS

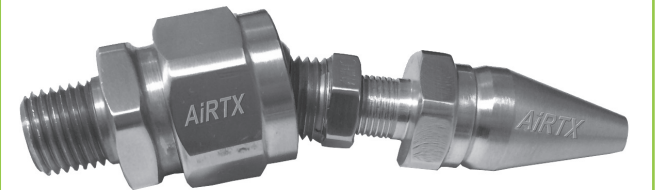

#### HEXAGONAL MANIFOLDS

### Fittings

#### AiRTX LOCKING SWIVEL FITTING

A 1/4" locking swivel fitting that allows for accurate positioning of any AiRTX nozzle or wedge.

LOCKING SWIVEL FITTING MODEL 38006-4  
WITH MODEL 48009 NOZZLE ATTACHED

1/4" TO 1/8" REDUCER

1/4" HEX PIPE PLUG

1/4" SHORT PIPE NIPPLE

1/2" SHORT PIPE NIPPLE

# SMARTVAC

A wet/dry vacuum that is compatible with steel or plastic drums and requires no electricity or maintenance.

Using normal shop compressed air at 80 psi, this portable vacuum creates up to 50% more vacuum than other shop vacuums and is 50% quieter than electric vacs. There are no moving parts to wear out and no maintenance. The SmartVac does an excellent job of picking up spilled fluids with the 15" wide squeegee attachment or dry chips and materials. SmartVac is designed to be used with either a metal or plastic 30 or 55-gallon drum.

The SmartVac kit includes the SmartVac, 10' of 1-1/2" hose, on/off valve with pressure gauge, squeegee, pick-up wands, crevice tool, round brush, drum cover and bolt locking ring. Filter bags and a steel dolly are available accessories.

FEATURES & BENEFITS

- High vacuum
- Fast debris removal
- Heavy material pick-up
- Portable
- No electricity or maintenance

SMARTVAC KIT #90755

COMPATIBLE WITH STEEL OR PLASTIC DRUMS

STRONG MAN SMART VAC KIT #99755

## STRONGMAN SMARTVAC

The StrongMan SmartVac has all the same features of the SmartVac, but packs a bigger punch. It creates a 50% stronger vacuum for faster removal of even the toughest debris.

# DRUM DEVIL &

Lightning-fast liquid transfer.

DRUM DEVIL KIT #90650

JUST 90 SECONDS TO FILL A 55-GALLON DRUM

A stainless steel, ultra fast vacuum system designed for use with 55 or 30-gallon steel drums. It utilizes an automatic float switch to prevent overfilling while easily picking up small debris and high viscosity liquid.

# DRUM DEVIL II

Efficient two-way liquid transfer.

DRUM DEVIL II KIT #90600

CAPABILITY TO FILL OR EMPTY A STEEL DRUM

The Drum Devil II has all the great features of the original Drum Devil, but has the ability to empty or fill its container. A simple twist of the knob on top of the unit changes the direction of operation.

FEATURES & BENEFITS

- Larger tank capacity than industrial shop vacuums
- Eliminates double handling of toxic materials and emptying vacuum canister
- Eliminates need for "floor dry" absorbent
- No efficiency loss after each use unlike electric-powered shop vacuums
- Automatic float switch to prevent overfilling
- Requires no electricity

# SPEEDVAC

A workstation vacuum and blow gun in a single unit.

The AiRTX SpeedVac provides the operator with both a blow gun and a vacuum in a single, hand held, easy to use device. Using only compressed air, there is no maintenance or diminished vacuum strength due to electric motors aging and losing service life. The SpeedVac is compact and lightweight, as well as cost-efficient. The system requires no canister, but instead vacuums wet chips or dry matter into any open container you have in the shop. Optional container covers are available. Switch the SpeedVac quickly from vacuum to blow mode with a simple reverse of the air chamber.

EASILY SWITCH FROM  
VACUUM TO BLOW GUN

SPEEDVAC MODEL 90401

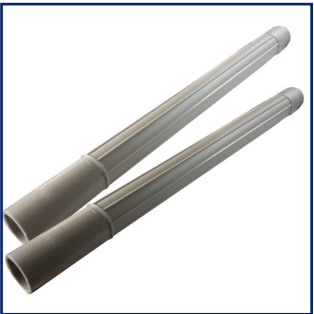

HOLEVAC MODEL 90420  
FOR REMOVING DEBRIS FROM DEEP HOLES

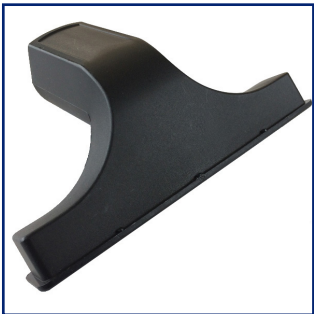

## ACCESSORIES

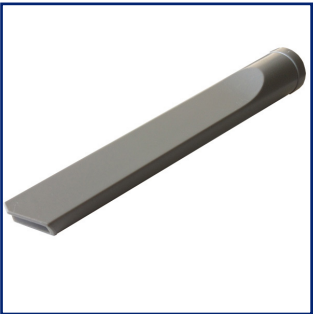

10' X 1.25" HOSE

19" PICK-UP WAND

SKIMMER

CREVICE TOOL

5 GALLON BUCKET COVER

3 GALLON BAG WITH  
SHOULDER STRAP

# HOPPERVAC

Effortless hopper loading without the cost of motor-driven loaders.

MOVES MATERIAL UP TO  
0.80" DIAMETER

HOPPERVAC #95308

The HopperVac is a unique method of loading a hopper without carrying a bucket of pellets up stairs or relying on expensive motor-driven loaders. Simply, place the HopperVac in the pellet container box and the other end over the hopper, turn the ball valve on and in seconds compressed air will transfer the pellets into the hopper. In addition, by reversing the HopperVac, you can easily unload the hopper to change colors or material, minimizing pellet waste!

### FEATURES & BENEFITS

- 0.80" Throat Diameter
- Variable feed rate up to 50 lbs/min
- Adjustable Strength (Factory set for 15 CFM @ 80PSI)
- 3' x 1.5" Aluminum feed tube
- 10' x 1.5" flexible hose
- On/Off ball valve
- No electricity
- No maintenance

# CONVEYVAC

In-Line dry material conveying made simple.

No need for expensive and maintenance needy conveying systems for moving products from one area to another. AiRTX compressed air operated ConveyVacs are easily installed in-line to almost any piping system and provide conveying without electric motors.

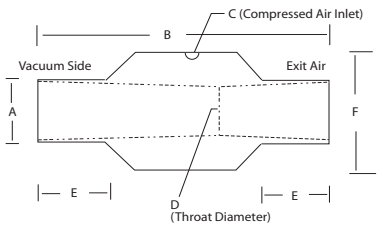

CONVEYVAC AVAILABLE IN 5 SIZES

## PULLS UP TO 12" HG VACUUM

### FEATURES & BENEFITS

- Fits standard PVC pipe sizes
- 5 sizes available in aluminum or stainless steel
- Boost air flow in existing vacuum
- No electricity
- No maintenance

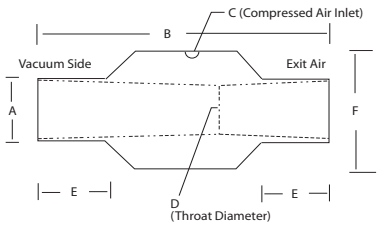

### ConveyVac

# IONIZING BAR

On-the-fly, high-speed static elimination.

Ionizing bars available with effective length from 3" to 120" and feature a unique, inductively coupled design that produces powerful static neutralization up to 6" from the target, while remaining shockproof. Each ionizing bar is supplied with 8' of cable and designed to be connected to the AiRTX 50000 Series Power Supply. The body of the ionizing bar is anodized aluminum with stainless steel emitter pins in plastic molding. All ionizing bars feature a power light to indicate when the bar is in operation.

FEATURES & BENEFITS

- Anodized case
- Quick-connect power supply
- Powered by 6,000V or 7,500V
- Stainless steel emitter points
- Shockless operation
- Works up to 6" from target
- Power light

IONIZING BAR KIT  
55000 SERIES

Ionizing Bar with Air Knife

**Static Elimination up to 20' (6m) away!**  
Pair an Ionizing Bar with an Air Knife and never worry about static again. The positive and negative ions emitted from the pins of the Ionizing Bar have a life of approximately 2 seconds before they recombine with the atmosphere. The AiRTX Air Knife provides a smooth laminar flow of air that carries positive and negative ions up to 20 feet from the bar.

IONIZING BARS 55000 SERIES

MODEL	EFFECTIVE LENGTH	OVERALL BAR LENGTH
55003	3" (76mm)	4.5" (114 mm)

# IONIZING BAR

## TECHNICAL DATA

IONIZING BAR  
SIDE VIEW

END VIEW

Effective vs. Overall Length

Ionizing Bars are available in effective lengths from 3" to 120" and the overall length is always 1.5" additional.

Customizable Mounting

All Ionizing Bars feature a versatile mounting bracket that can be customized for your application.

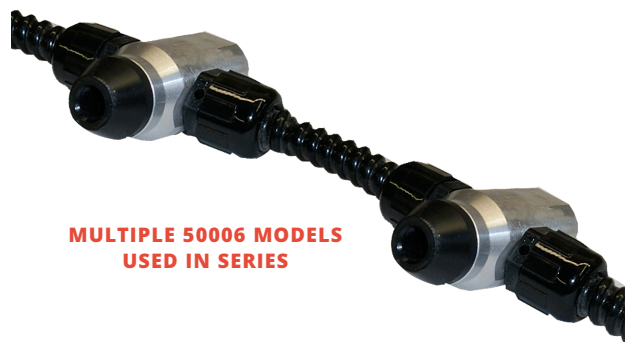

# SINGLE POINT IONIZER

Precise, long-range static elimination.

Single Point Ionizers deliver static-neutralizing air to a target from long range while also blowing away contaminants. They can be installed in series and linked to a single cable.

MODEL 50006

MULTIPLE 50006 MODELS USED IN SERIES

# IONIZING AIR GUN

Handheld, on-demand static elimination.

The Ionizing Air Gun is perfect for spot cleaning needs. It pairs an AiRTX Single Point Ionizer with a hand-held Air Gun and only weighs 11 oz. (300g). The Ionizing Air Gun consumes 12 CFM of air @ 80 psi and will eliminate static without blowing debris from surrounding areas onto finished product.

MODEL 50003

# POWER SUPPLY

A universal power supply for all AiRTX static elimination products.

MODEL 50000-1  
4-PORT 230V

MODEL 50002-1  
2-PORT 230V

The AiRTX Static Elimination Power Supply is compatible with the Static Bar, Static Bar with Air Knife, Single Point Ionizer and Ionizing Air Gun. There are two levels of power output: a 2-port unit that supplies 6,000 Volts of power and a 4-port unit that supplies 7,500 Volts of power to neutralize any statically charged item. Both Power Supplies operate on low amperage and power output is available as a 115 Volt or 230 Volt configuration. Every model features a lighted power indicator.

UP TO 7,500 VOLTS OF POWER
